

SUBJECT INDEX TO VOLUME 41

Acoustic emission, 152, 221

Angle-ply laminates, 109

Carbon fibre (Poisson ratio), 1

Carbon fibre surface, 21

Carbon fibres (intrinsic properties), 287

Carbon/carbon composites, 55

Carbon/epoxy interface, 13

Creep compliance, 310

Cross-ply composites, 147

Cut fibres (strain concentrations), 249

Damage accumulation, 221

Damage zone model, 259

Damping (in laminated composites), 379

Delamination

promoters, 364

resistance, 82

resisters, 365

Discontinuous fibre MMCs, 213

Double rail shear test, 263

Duplex fibre concept, 363

Failure analysis (woven composites), 129

Fibre

bridging, 55

coating, 354

pull-out, 350

structure, 19

surface treatments (sisal), 67

Finite elements, 129, 158, 194, 270, 381

Fractographic analysis, 160

Fracture (interleaved composites), 77

Fracture toughness, 91

composites, 335

GRP tubes, 221

Hygrothermal ageing, 228

Impact damage tolerance, 89

Interface

carbon/epoxy, 13

control, 333

shear stresses, 241

Interfacial adhesion, 37

Interfacial debonding, 350

Interfacial studies, 31

Interlaminar fracture, 147

Interleaved composites, 77

Intermittent coating, 354

- Losipescu test, 263
Liquid crystal domains, 179
Loop test (carbon fibres), 289
- Matrix rheology, 221
MMCs, 213, 411
Mode I fracture, 147
Morphology (liquid crystal domains), 184
- Notched composites, 257
- Off-axis tests, 55
Orthotropic plates, 47
- PEEK composites, 303
Poisson ratio (for carbon fibres), 1
Pultruded GRP composites, 395
- Shear failure analysis, 257
Shrinkage stress control, 367
Silane treatment (sisal/epoxy composites), 165
- Sisal/epoxy composites, 165
Sizes, 24
Stiffness reduction (MMCs), 421
Strain concentration factors, 237
Stress analysis (non-classical), 63
Stress concentration factor, 47
Structure of carbon fibres, 19
Superposed hydrostatic stress (effect on strength), 395
Surface treatment, 21
- Thermal buckling, 109
Thermal residual stresses, 213
Three-dimensional stress states (effect on damping), 379
Toughness maps, 348
Transverse properties, 15
- Unidirectional composites, 237
- Viscoelastic effects (PEEK composites), 303
- Woven hybrid composites, 129

AUTHOR INDEX TO VOLUME 41
